tinent in 1868, he stopped for a few days at Salt Lake City, and while there had an interview with Brigham Young, in which he took occasion to inquire particularly into the doctrines and policy of the Mormon Church. The following is the full report of the conversation as given by Mr. Greeley. We commend it to our readers as

My friend, Dr. Bernhisel, M.C., took me this p. m. We were very cordially welcomed at the door by the President, who led us into the sec-Kimball, Gen. Wells, Gen. H. G.—Apart from this, in what respect do

your doctrines differ essentially from those of our orthodox Protestant Churches—the Baptist or Methodist, for example?

B. Y.—We hold the doctrines of Christianity as revealed in the Old and New Testaments, also in the Book of Mormon, which teaches the same

We think a man who cannot make his living aside from the ministry of Christ, unsuited to that office. I am called rich, and consider myself worth \$250,000; hut no dollar of it was ever paid me by the church, or for any service as a minister of the everlusting gospel. put away, commits adultery? -Yes, and I hold that no man should ever put away a wife except for adultery-not always even for that. Such is my individual view of the matter. I do not always say that wives have never been put away in our church but that I do not approve of the practice. II. G .- How do you regard what is commonly

Tempest in a Tea Pot.

The terrible strife between the Clericals and Liberals of Switzerland still rages with unabated violence. "Who," said a stranger to the Pre sident of a canton, who at a state banquet had risen to greet a late guest with effusion, " who is that rather mutton-headed gentleman you have just welcomed?" "My predecessor, a tool of Romish tyranny. At the election before, he deleated me by spreading a hellish calumny that I But, of course, in cantonal politics, when I come in, the policy of my predecessor is reversed.

If he was elected, there would be a similar sction on his side." "What direction does this change of policy take?" "I will explain. For many years the canton has been repairing the town ball and the cathedral. When I am in power, I push on the repairs of the town hall; when that minion of a debased heirarchy secures cathedral. Cork is likely to supercede the use of India rubber in machinery, especially where the pres-eure is very great. A pressure of great power will destroy India-rubber, causing it to break or split up into small pieces, losing its elusticity entirely. No such result follows in the case of cork, properly prepared. Cork is first soaked in a mixture of water and molasses, which gives it some softness and permanent moisture. It is then cut into discs eight inches in diameter. As many of these as are needed are put into a castiron box, an iron lid applied, lid and corks having a hole in the centre, the corks are pressed down to half their original thickness, a bolt is run through the centre and nuts and screws hold them in place. A spring thus formed, tested by a ten-tons pressure, shows an elasticity like com-
